

Martock Ridge Community Wind Farm

Scotian Wind Inc invites you to attend a Public Open House for project updates and information on how you can help bring the benefits of renewable energy to the Windsor/West Hants area.

**You are welcome to drop in on Wednesday February 13 anytime between
7pm to 830pm
at the Hants County War Memorial Community Centre**

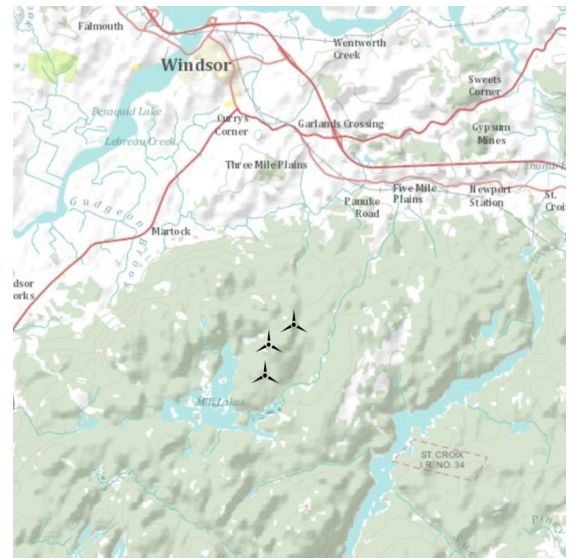

The Martock Ridge Community Wind Farm is a proposed wind project under the Community Feed-In-Tariff program of the provincial government. You can learn more about the ComFIT program and its community components and community benefits at nsrenewables.ca.

The project will consist of 3 wind turbines rated at a total of 6MW of power. The energy produced will feed directly into the local grid that powers homes and businesses in the area.

Scotian Wind Inc is the lead proponent of this project and is a Community Economic Development Investment Fund (CEDIF) that promotes local ownership in its wind energy projects. You can learn more about Scotian Wind Inc and opportunities to invest in our projects at www.scotianwind.ca.

The Scotian Wind offering is a chance to support your local turbine project while diversifying risk across their six ComFIT approved projects.

For a minimum \$100 commitment you can get involved.

As an investor, there are several benefits to buying shares in a CEDIF:

- You receive a 35% non-refundable provincial income tax credit on your investment
- Your investment is RRSP eligible; this tax deferral is in addition to the Nova Scotia Tax Credit

NOTE: This CEDIF Offering is made through an Offering Document, which can be obtained from an authorized sales agent or finder (Contact Dan Roscoe at 1-877-798-5085). This Offering constitutes an exempt Offering of these Securities only in Nova Scotia by authorized sales agents. Investors should read the Offering Document before making an investment decision.

Environmental Assessment Feedback open until February 23rd.

Strum Environmental have completed phase one of the Environment Assessment for the project. The community is welcome to comment and provide their input through our meeting on February 13 or directly through the government web site at: <http://www.gov.ns.ca/nse/ea/martock-ridge.asp>

The project computer model view from J.W. Mason Property.

Community Dividend

Scotian Wind is putting money into the communities that host our projects. 1% of revenue from each turbine will be reinvested into community projects as chosen by the community. We estimate that will mean approximately \$15,000 to \$20,000 toward community projects in the Martock/Windsor area each year.

We're listening - Contact us at:
